DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Sukegawa et al.

Re claim 1, Sukegawa et al. discloses a garnish (3) for attaching to a vehicle body portion in cooperation with a weather strip seal (see figure 2, the seal at the left end of the garnish) and a plurality of seal clips (10), the garnish having a first end and a second end (see figure 1) and having at least one fore slot (16b) formed therein proximate the first end, and at least one aft slot (16b) formed therein proximate the second end, the garnish defining a profile between the first and second ends for partially covering the vehicle body portion, the garnish being alignable in registry with the weather strip seal and with the vehicle body portion, such that for each of the respective fore and aft slots, a single clip (10) attached to the weather strip seal can be inserted through the slot in the garnish and into a hole formed in the vehicle body portion, to attach both the garnish and the weather strip seal thereto.

Re claim 2, the vehicle body portion is a door sash frame.

Re claim 3, the garnish has a first tab (16) with an eyelet (16a) formed therein attached to the first end, and a second tab with an eyelet formed therein attached to the second end thereof.

Art Unit: 3612

Re claim 4, the garnish comprises integral front and rear attachment flanges (16), with the fore slots formed in the front attachment flange, and the rear slots formed in the rear attachment flange.

Allowable Subject Matter

3. Claims 6-12 are allowed.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nozaki and Enomoto et al. disclose vehicle garnish assemblies.
